

## Learning Goals

The student will demonstrate:

1. The ability to think critically, creatively and reflectively in making decisions and solving problems;
2. The ability to direct his or her own learning, including planning and carrying out complex project;
3. The ability to communicate through reading, writing, speaking, listening, and through an integrated use of visual forms such as symbolic and graphic images;
4. The ability to use current technology, including computers, to process information and produce high quality products;
5. The ability to recognize and perform basic mathematical computations;
6. The ability to participate as a member of a team, including providing leadership for achieving goals and working well with others from diverse backgrounds;
7. The ability to deliberate on public issues which arise in our representative democracy and in the world by applying perspectives from the social sciences;
8. The ability to understand human diversity and communicate in a second language, applying appropriate cultural norms;
9. The ability to interpret human experience through literature and the fine and performing arts;
10. The ability to apply science and math concepts and processes, showing an understanding of how they affect our world;
11. The ability to understand positive health habits and behaviors that establish and maintain healthy interpersonal relationships;
12. Knowledge of the rights and responsibilities of citizenship and the ability to apply that knowledge to the benefit of the community.
