

Guidelines for Transportation of Students to Sites Other Than Home

As long as there is room on buses and there is no requirement for extending a bus route, the district will provide transportation to non-home sites under the following guidelines:

1. The transportation must be arranged in advance, in writing, unless it is an emergency (cleared by phone call to school or transportation supervisor) or a one day change in destination (cleared by parent note to school).
2. The transportation must be to a parent approved destination for adult supervision of the student(s).
3. The transportation must be on the first available bus that goes to that destination.
4. The written arrangements must be approved by the transportation supervisor before the change will commence.
5. Emergency or one day changes must be to destinations involving adult supervision.

Questions about these guidelines should be directed to the transportation supervisor.
